There is no better time to be in the garden, get organised this weekend to spend time at home sprucing up the yard - its good healthy family time!

Its warming slightly, we've had a spot of rain the sun will be shining and there's humidity in the air its perfect growing weather, you can't beat this combination and a temperature about 18 - 23 degrees. This weekend use our wishlist to select your favourite flowering annuals and vegetables, print your wishlist and go shopping, do this early and spend the rest of your time enjoying the garden. Check the seasonal availability on items before adding them to the list.
